

Instant Replay®

THE ORIGINAL HOT-KEYS AUDIO PLAYER

Now with editing.

DR-554-E Instant Replay

Instant Sound Effects. Instant Music. Instant Fun.

Features

- ▶ Instant access to 1,000 cuts
- ▶ New! Precise editing of heads, tails, fades and levels
- ▶ Large illuminated buttons for easy hands-on operation
- ▶ Displays cut names, ID numbers, and length
- ▶ Store multiple playlists of any size

360 Systems' Instant Replay® places 1,000 audio cuts at your fingertips! Get instant access to an entire audio library of your own creation.

Instant Creativity

Pack it up for the road, or install it in the studio or control room. Instant Replay is designed for creative people who need quick response, intuitive operation, and top quality audio. It's a completely self-contained production studio and spot player in a box. And unlike PCs, Instant Replay has the immediacy of *real buttons*.

Intuitive Operation

Straightforward controls make operation easy and intuitive. Instant Replay records CD-quality audio directly to hard disk, edits it, and then provides playback from 50 Hot-Keys. Play your cuts instantly, in any order, as many times as needed. When audio elements are needed in a special sequence, Instant Replay lets you build playlists, and store them for future use.

Storage To Spare

Instant Replay stores *24 hours* of stereo on its large internal hard disk. There's never a restriction on cut length—record anything from a short sound effect to full-length musical performances. Instant Replay always delivers premium audio quality, with zero delay.

New Editing Features

Our new "Dash-E" software includes powerful new editing tools like head and tail trims, fade-ins, fade-outs, and even gain changes. Now it's easy to extract sound effects from a bed, or make loops of music and ambient effects.

Find Audio Clips Fast

Instant Replay arranges cuts in banks of 50, so related sound effects or music cues can be stored together. The built-in keyboard makes it easy to give each cut a name and a unique ID number.

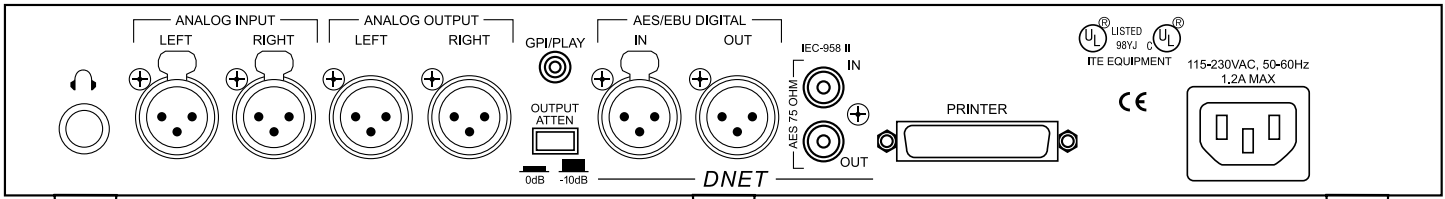

Printer Port Included

Instant Replay lets you print handy paper listings of its contents, sorted by cut title, cut ID number, or by Hot Key. Also available are punched front panel overlays, which can be printed with a title for each Hot Key.

The Original

360 Systems' Instant Replay is perfect for Radio, Television, Audio/ Visual, or Live Events—any application where quality music or effects play from *your own* audio library. Instant Replay—the Original Hot-Keys audio player.

PROFESSIONAL DIGITAL AUDIO
